# Deltek+ADP
## INTEGRATION

Blackbox Connector offers cutting-edge solution integrations to complement and enhance your Deltek product investments.

Our Blackbox team helps to identify and bridge gaps between various business systems, offering several third-party integrations into Deltek Vantagepoint. Our API capabilities include data pulls and custom-built integrations.

## HOW DOES IT WORK?

Both Deltek Vantagepoint and ADP have what are called Application Programing Interfaces (APIs). These interfaces allow the applications to share data without intervention by a user. This creates both time savings and error reduction when data needs to duplicate into more than one system.

**Deltek Vantagepoint**

- Employee Add
- Change to Employees
- Term Employee
- Provision User/Role

API CLOUD SERVICES

**Blackbox** CONNECTOR

**ADP**

- Employee Add
- Change to Employees
- Term Employee

# Application Programming Interfaces (APIs)

Once your API is turned on the following will occur:

**FREQUENCY**

Once your API is turned on your data will update at the frequency you choose..

**SYNCING**

Leverage intelligent synchronization that identifies changes in source records in ADP.

**DATA MAPPING**

Make changes to your data mapping through an easy-to-use intuitive interface.

**STATUS CHECK**

Easily identify the status of data synchronization through our Blackbox Connector portal.

Once you are ready to start, a few things need to take place:
- Integration access needs to be turned on from both systems
- System settings need to be validated to make sure all the data is in both systems as needed
- Blackbox Connector will then add the middleware to connect the two systems
- Testing will occur
- Final deployment is completed

Generally, it is a 30 to 60 day implementation process to get your API live and running. It is important that all connections are tested thoroughly before deployment to production.

Since Blackbox Connector has developed a service to support API's, we can charge a fraction of the price for the setup and hosting.

Blackbox Connector's API service has 2 cost components:
- Setup fee
- Annual operational fee includes:
  » Access to API portal
  » Q&A on issues
  » Hosting of API

Charges are calculated based on number of API connections that are made.

**NEXT STEPS**

Interested in learning more? Once there is some interest, it is best for the customer to have a call with the Blackbox Connector team. We will describe the integration process in more detail and follow up with a customized proposal. Our team is always available to jump on a call with you to discuss!

**ABOUT BLACKBOX CONNECTOR**

The Blackbox Connector Platform provides no code, easy to implement solutions focused on connecting your Deltek system to 3rd party business applications. Dramatically reduce integration time and ditch costly development efforts; never worry about upgrades, software patches or hotfixes again!

**ABOUT ADP**

ADP is a HR and payroll solution that works for you and your employees, so everyone can reach their full potential. With over 70 years of success, ADP knows all businesses have unique needs and can offer solutions for small, midsized or large businesses.
